Become a Job-Ready Data Analyst in 3/4/6 Months
Work Like a Real Analyst from **Day 1**
Practical Internship | May Earn ₹5,000–₹10,000
(Performance-Based)

100% Placement Support until you get hired!

 **Book Your FREE Counseling Call on WhatsApp**

WhatsApp:91- 9607157409

WHY ACC IS NOT LIKE OTHER PROGRAMS

Real Work From Day 1

Unlike theory based programs, ACC makes you work like a real Data Analyst intern from Day 1. You start handling practical tasks with Learning Material, real datasets, and daily workflows immediately, so you gain real experience from the very first day.

50% Learning + 50% Working (Daily)

You learn through content, materials, and mentor guidance, and then apply everything instantly through daily tasks, real datasets, AI workflows, and startup style operations. You study and work like a real analyst every day.

Real Corporate Work Culture

You follow a proper corporate workflow with login/logout, daily standups, priority tasks, reporting, and client-style challenges. This builds discipline, confidence, and true job readiness.

Earn While You Learn (Performance-Based)

During the internship phase, learners may earn ₹5,000–₹20,000 based on performance. You work with us, learn with us, and may earn during your training while building real experience.

Affordable Fee — Not ₹1–2 Lakhs Like EdTech

ACC follows an accessible education model: Total ₹10,000, with ₹7,000 now and ₹3,000 after getting a job. Practical learning should be affordable for everyone.

Job-Readiness Guarantee (Not Fake Job Guarantee)

We don't promise jobs we make you job-ready. You build real skills, portfolio projects, interview preparation, and hands-on experience that actually lead to jobs.

Mission-Driven, Not Sales-Driven

ACC's mission is clear:

"Affordable Education. Real Skills. Reduced Unemployment."

Goal: Convert 1 Lakh Unemployed → Employed.

We are not here to sell big courses.

We are here to build careers.

ABOUT THE MENTORSHIP PROGRAM

Thousands of students complete data courses every year – yet many still struggle to build real skills and confidence.

The problem is not a lack of knowledge. The real issue is that they are not **guided, industry-ready, or Job-ready.**

Most courses teach theory, but today's analytics world requires **practical skills, AI tools, workflows, and mentorship.**

Companies now expect analysts to work with **automation, dashboards, and problem-solving** and **job ready** from day one. To solve this problem, we created the **Analytics Career Connect Mentorship Program** a complete, modern data learning system designed to help you grow with **hands-on projects, expert mentorship, and AI-powered workflows.**

This is not just a Data Analyst program. We prepare you for **multiple real-world roles, with technical depth, projects, and AI integration.**

What we focus on:

- Building your technical skills across top **analytics tools + AI-enhanced workflows**
- Developing soft skills, communication, teamwork, and problem solving
- Working on 20+ real projects across industries
- Learning how to use **AI Co-Pilot tools for SQL, DAX, EDA, documentation, and insights**
- Team collaboration in a **corporate-style environment**
- Exposure to 12+ industry domains like E-commerce, Banking, Retail, Healthcare, and more
- Simulated job tasks, dashboards, automation pipelines
- Building a complete job-ready portfolio with AI support

WHY CHOOSE THIS PROGRAM?

We spoke with hundreds of students and professionals. Most of them completed multiple courses... yet still couldn't build real skills or enter the industry.

Why does this happen?

Because traditional edtech programs only **teach theory and recorded modules**, not real work.

Most of them give **dummy projects**, not real datasets, real tasks, or corporate workflows.

Students learn concepts, but they never learn how to work like a real Data Analyst.

We studied these gaps across the industry **no practical work, no daily tasks, no corporate culture, no AI usage, no real-world exposure** and that's exactly why we launched our **AI-Powered Practical Mentorship + Internship Program**.

Our model gives you **real work, real experience, real processes, and real responsibilities from Day 1**.

What makes this program different?

✓ 50% Practical Work + 50% Learning (Daily Work-Integrated Model)

You learn concepts and immediately apply them through real tasks just like working in a startup.

✓ **AI-Integrated Learning (Every Module Includes AI Tools)**

Learn to use AI for analysis, automation, reporting, insights, and faster decision-making.

✓ **Real Client Tasks & Daily Startup Operations**

You don't just learn tools — you perform tasks analysts do in real companies.

WHY CHOOSE THIS PROGRAM?

✓ **Work Like a Data Analyst Intern From Day 1**

Daily standups, deadlines, reporting, team communication, and real analyst responsibilities.

✓ **With Dummy Projects – Get Real Experience**

Other programs give sample datasets and fake projects.

Here, every task is practical, meaningful, and experience-building.

✓ **Earn While You Learn (Performance-Based Stipend ₹5,000–₹20,000)**

During the internship phase, eligible learners may earn based on performance.

✓ **Affordable Education – Not ₹1–2 Lakhs Like Other Programs** **Total fee: ₹15,000 only**

Pay ₹10,000 now + ₹5,000 after getting a job.

✳ **Zero Theory Overload – 100% Applied Learning**

Concept → Task → Execution → Review → Corporate-style output.
The Outcome

You don't just "complete a course."

You learn to **think, act, and perform like a real Data Analyst**, with real work experience, AI-powered skills, and corporate readiness the exact combination companies hire for.

HOW DOES IT WORK?

Our program is built to make you **work and learn like a real Data Analyst** from Day

You can choose your learning style:

■ Full-Time (6 hours/day) – Fast job-ready path

■ Part-Time (2–4 hours/day) – Flexible for students & working professionals

Both modes offer the same corporate experience and job-ready training.

Daily AI-Powered Learning + Real Work

You follow a real corporate routine:

- Login / Logout | Daily standup meeting | Learning + practical tasks
- Real startup projects (no dummy tasks) | Real datasets & real problem-solving
- 5-day work schedule with 2 days off | AI tools for SQL, EDA, insights & automation

From Day 1, you act like an intern, not a traditional student.

Corporate-Style Work Culture

- You work exactly like analysts in real companies:
- Task management | Real workflows | Daily, Weekly sprints & reviews
- Cross-functional teamwork | Deadlines & reporting

This builds discipline, confidence, and job-ready skills.

Personalized Mentorship

- Live mentor sessions | Daily check-ins | Roadmap based on your speed
- AI-driven resume & LinkedIn optimization | Mock interviews with feedback

You get complete support to grow fast.

Real Internship Experience

You become part of real startup projects, handle real responsibilities, and apply everything learned.

This is actual work experience, not course practice.

Outcome: Become a Job-Ready Data Analyst

By the end of the program, you gain:

Real experience | Real projects | AI-powered skills | Corporate culture knowledge

Full job-ready confidence

ACC's mission remains: **Affordable Education. Real Skills. Reduced Unemployment.**

What Will You Learn?

Our curriculum is aligned with industry needs and job-ready outcomes.

Technical Skills (10+ Tools)

- Excel
- SQL
- Python
- Power BI
- Tableau
- MySQL
- Google Sheets
- Data Cleaning & Preprocessing
- Machine Learning Basics
- Cloud Platforms (Basics)

Industry Domains (12+ Fields)

- E-commerce
- Retail Healthcare
- Banking & Finance
- Marketing
- Sales
- Telecom
- HR Analytics
- Education
- Entertainment
- Supply Chain Hospitality

Generative AI / AI Tools for Data Analytics

- ChatGPT / GPT-4 / GPT-5
- Google Gemini
- Perplexity AI
- Claude (Anthropic)
- DeepSeek-R1
- Excel AI / AI-powered Analytics Tools
- AI-driven Data Visualization Tools
- Automating reports with Python & Power BI
- AI-driven SQL & DAX generation
- Automated insights + narrative summaries
- Dashboard automation workflows
- API integration for real-time data
- Web scraping & data extraction tools

Career Development

- Resume & LinkedIn Optimization
- Soft Skills & Communication Training
- Job Search Strategy & Branding
- Mock Interviews & Feedback

What Will You Get?

- AI-powered workflows & automation training
- Real Internship experience
- Corporate-style collaboration & sprint-based tasks
- Hands-on exposure to SQL, Power BI, Python, APIs & Automation
- Freelance & paid project opportunities (Top Performers)
- Career Support: Resume, referrals, mock interviews & LinkedIn
- Optimization
- Access to community, templates, resources & lifetime learning support

Job Roles You'll Be Ready For (30+ Roles)

- MIS Analyst
- Business Intelligence Analyst
- SQL Developer
- Power BI Developer
- Tableau Developer
- Junior Data Scientist
- Reporting Analyst
- Product Analyst
- Marketing Analyst
- Data Visualization Specialist
- Data Quality Analyst
- Data Operations Analyst
- Data Entry + Automation Assistant
- Forecasting Analyst
- Dashboard Designer
- BI Consultant
- CRM Data Analyst
- HR Analyst Financial Data
- Analyst Supply Chain Analyst
- Junior Data Engineer
- Business Reporting Executive
- Analytics Associate
- Data Analyst AI-Augmented
- Data Analyst Research Analyst
- Data Automation Specialist
- Data Insights Analyst
- AI Reporting Analyst
- Analytics Automation Engineer
- Data Documentation Analyst (AI-assisted)
- AI Prompting Analyst for Data Teams
- AI Dashboard Developer

MESSAGE FROM THE FOUNDER

Hey future Data Analyst,

I want to talk to you honestly.

First thing I want to make very clear

My company is not here to sell you a course.

We are here to give you transformation.

While working in IT, doing internships, and handling real projects, I noticed one painful truth

Education has become the root cause of most problems.

And today, it is becoming more and more expensive.

Especially in tech, where EdTech courses start from **₹50,000 to ₹5,00,000**, people like us the middle-class majority of India – simply cannot afford it.

And the sad part is:

Edtech means to make education affordable and accessible... but they did the opposite.

That's why I built **Analytics Career Connect (ACC)**.

ACC is created for people like me

people who have dreams, talent, hunger... but don't have lakhs of rupees to spend.

I wanted to build a platform where:

- You learn practically
- You earn while learning
- You gain real experience
- And you become truly *job-ready* as a Data Analyst

Not just theory.

Not just certificates.

Real work. Real skills. Real outcomes.

If you are joining ACC, remember

you are not joining a course...

you are joining a journey that can change your life.

— Wasim Patwari

Founder, Analytics Career Connect (ACC)
